REASONS FOR ALLOWANCE

The claimed invention of a plural parallel power converter control circuit is found to be allowable over the prior art since a control circuit comprising a feedback control unit determining the deviation of the output voltage of the plural parallel power converters from a reference signal, integrating this deviation, arithmetically summing this deviation with this integration of the deviation, and changing the duty ratio of the driving pulses controlling the switching devices of the plural parallel power converters in response to the magnitude this arithmetic sum and a phase control unit synchronizing the phases of the driving pulses when either of the deviation or integration signals exceeds a threshold was not found to be singularly or collectively taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Sterrett whose telephone number is (571) 272-2085. The examiner can normally be reached on Monday-Thursday & 8:00am-5:00pm.
